

HAWIKUH

Sawyer and Southern, a leader in innovative flooring designs, presents the Quartz PC collection. Inspired by ancestral Pueblo sites, the line features emulated reactive stains and color dimensions not found in other lines. A quartz PC offers Character and Select looks that will enhance any interior space, all centered on European Oak in wide widths of 7.2" with lengths of 5". Aride QPC brings timeless beauty to any setting.

QUARTZ P:
All images are produced to be a close representation of the actual finished product. The finished flooring may contain a larger variation of color, grain, knots, and other character that may be evident in the smaller sample you are viewing. Images that are aged or have been exposed to direct sunlight may appear different (darker or yellowed), than the flooring it is meant to represent. // The **Select** designation is an emulation of a natural wood flooring Select grade, chosen to represent an aesthetic Select. Wood features such as knots and checks, along with other character, are limited presenting a cleaner look. This grade is truly the most ideal for a refined look in wood flooring. QPC features a unique patented process, presenting incredible clarity and durability.
